

# Abstract for a Dairy Farm and Dairy Production Line

*Ensymm abstract for dairy farm with milking unit and dairy production line for production of different products*

# PROJECT DESCRIPTION

The project scope is as follows:

Establishing a live stock farm and a dairy factor with the best possible output and quality, upon selection of best race, preferred for dairy products.

## Project Units and Phases

The project is divided into 4 Phases:

1. Farm
2. Milking Unit
3. Dairy processing plant to process the milk for different finished products (milk/cheese/ yogurt etc.)
4. Filling/ Labelling/ Packing
5. Sales/ Administration/ Marketing

## Roadmap for the Project

1. Your general feedback for your interest to cooperate with our Team.
2. Upon your further interest and request we will offer you an expert report/ general feasibility prepared by the ensymm project team.
3. Signing a memorandum of understanding to take responsibility as project manager with our selected project team for technology/process know how and engineering/turnkey plant supplier for project execution.
4. After detailing project quotation with technical detail and scope of supply, negotiation towards signing a delivery contract.
5. Supply, delivery, installation, start up and training.
6. Project accomplishment.

For this Project, we will cooperate with our Technology Partner from Germany.

They support us by selecting the right goat expert for dairy milking process, dairy process and manufacturing of finished products. Selecting of the right supplier for machinery and turnkey plant (excluding farm that will be done by another technology partner); selection of the right dairy additives and raw material for the process. The machinery supplier will be selected under ensymm project guarantee from the best feasible suppliers worldwide.

ensymm is a German based premier project consulting company for Life Sciences, serving biotech companies, pharmaceutical industry and food ingredient companies. We provide clients with a variety of business and technology consulting services as well as with specialized teams in various areas of our competence.
